INASS

International Journal of
Intelligent Engineering & Systems

http://www.inass.org/

Please Insert Main Title (Bold type, 14-point font size)

Fisrt Name and Family Name[1]* **Fisrt Name and Family Name[2]**
Fisrt Name and Family Name[1,2]

[1]*Author's Affiliation 1, Country*
[2]*Author's Affiliation 2, Country*
* Corresponding author's Email: author@fit.ac.jp

Abstract: The abstract must appear at the beginning of the main text, immediately below the author information and separated from it by a horizontal line. Use the heading "Abstract" in 10-point Times New Roman, bold, with an initial capital letter. The abstract text should be written in 10-point Times New Roman, single-spaced, and must not exceed 150 words. Please do not use special characters, symbols, or mathematical expressions in the title or abstract.

Keywords: Use the heading "Keywords" in 10-point Times New Roman, bold, with an initial capital letter. The keywords should be written in 10-point Times New Roman, single-spaced, with only the first letter of each keyword capitalized, except for acronyms, which should retain their conventional capitalization. Keywords should be separated by commas (e.g., Power converters, Switched-capacitor circuits, Integrated circuits, RBFNN, CNN). Place a horizontal line immediately below the keywords. Leave one blank line after the horizontal line, and then begin the Introduction section.

1. Introduction

All manuscripts must be in English. These guidelines include complete descriptions of the fonts, spacing, and related information for producing your proceedings manuscripts.

2. Formatting your paper

All printed content, including text, figures, and charts, must be confined within a print area measuring 17.2 cm in width and 24.62 cm in height. For A4-size paper, set the top and bottom margins to 2.54 cm and the left and right margins to 1.9 cm. These settings correspond approximately to the "Moderate" margin preset in Microsoft Word. The header and footer distances should be set to 1.5 cm and 1.75 cm, respectively. No text, figures, charts, or other content may extend beyond the designated print area.

All text must be formatted in one columns. The text must be fully justified.

3. Main title

The main title on the first page should be centered and placed below the figure at the top of the page. It must be set in 14-point Times New Roman, bold. Capitalize the first letter of all nouns, pronouns, verbs, adjectives, and adverbs. Articles, coordinating conjunctions, and prepositions should not be capitalized unless they are the first word of the title. Leave 10.5 points of space above the title and 14 points below it.

4. Author name(s) and affiliation(s)

This article is licensed under a Creative Commons Attribution-ShareAlike 4.0 International License.
License details: https://creativecommons.org/licenses/by-sa/4.0/

Author names should be centered below the title and set in 11-point Times New Roman, bold. For multiple authors, leave a space equivalent to 10 consecutive half-width spaces between adjacent author names. If author names extend over multiple lines, each author's full name must remain on a single line. Do not insert a line break between the given name and family name of an individual author. All author affiliations must follow the IEEE affiliation format and be centered below the corresponding author names in 11-point Times New Roman, italic. Each affiliation should include the department or division, institution or organization, city, and country, where applicable. Full postal addresses and postal codes should be included where possible.

Do not use acronyms or abbreviations in author affiliations; spell out all institution, department, and organization names in full. Academic, professional, or administrative titles and positions should not be included. Identical affiliations should not be repeated; authors sharing the same affiliation should be grouped under a single affiliation entry.

For multiple authors, a two- or three-column layout may be used. All author affiliations must be consistently formatted in italic, regardless of the number of authors or the layout used. The corresponding author's email address should be centered and set in 10.5-point Times New Roman, regular, as illustrated.

Do not include ORCID identifiers. ORCID profile links, ResearchGate or Google Scholar profile links, personal website URLs, or any other external links in the author name and affiliation section.

5. Type-style and fonts

Wherever “Times” is specified, either Times Roman or Times New Roman may be used. If neither font is available in your word-processing software, use a font that closely resembles Times in appearance. The use of bitmap fonts should be avoided whenever possible. TrueType or Type 1 fonts are recommended.

6. Main text

The main text should be set in 11-point Times New Roman and single-spaced. Double spacing should not be used. In Microsoft Word, use the “Exactly” line-spacing option to maintain consistent and compact line spacing throughout the manuscript. Each paragraph must begin with an indentation equivalent to 1.5 times the character size. The text must be fully justified, with both the left and right margins aligned evenly. Do not insert additional blank lines between paragraphs.

7. First-order headings

For example, the heading “1. Introduction” should be formatted in 12-point Times New Roman, boldface, with only the first word capitalized, except for proper nouns and acronyms, which should retain their conventional capitalization. The heading should be aligned flush left. A period (".") should follow the heading number, not a colon.

7.1 Second-order headings

As demonstrated in this heading, second-order headings should be formatted in 11-point Times New Roman, boldface, with only the first word capitalized, except for proper nouns and acronyms, which should retain their conventional capitalization. The headings should be aligned flush left.

7.1.1. Third-order headings

Third-order headings, such as the one in this paragraph, are generally discouraged. However, if their use is necessary, they should be formatted in 10-point Times New Roman, boldface, with only the first word capitalized, except for proper nouns and acronyms, which should retain their conventional capitalization. The headings should be aligned flush left.

8. Footnotes

Footnotes should be used sparingly, if at all, and must be placed at the bottom of the column on the same page where they are referenced. They should be formatted in 9-point Times New Roman, single-spaced. To enhance readability, it is recommended to avoid footnotes entirely and instead incorporate any necessary supplementary remarks directly into the main text, preferably within parentheses, as demonstrated in this sentence.

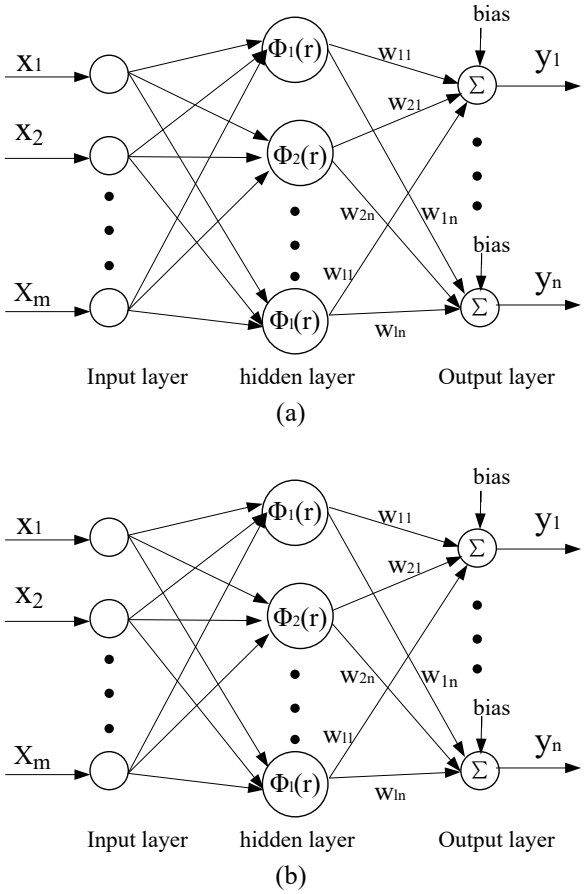

Figure 1. System model: (a) top figure and (b) bottom figure

Table 1. Definition of terms

Immune system	Vehicle detection system
Antigen	Pre-processed vehicle objects

* In figures and tables, the font size is 10pt.

9. Figures and tables

Figures and tables should be integrated into the text. When referring to figures and tables in the main text, use "Fig. 1", "Fig. 2", etc., for figures and "Table 1", "Table 2", etc., for tables. In figure captions and table titles, use "Figure 1.", "Figure 2.", etc., and "Table 1.", "Table 2.", etc., respectively. Leave one blank line above and below each figure and table, including its caption or title, to ensure clear separation from the main body text.

Callouts, figure captions, and table titles should be set in 10-point Times New Roman, regular. Only the first word of each figure caption and table title should be capitalized, except for proper nouns and acronyms. Figures and tables must be numbered independently and sequentially.

All figures and tables, including their captions and titles, should be horizontally centered within the column. Figure captions should be centered below the corresponding figures, whereas table titles should be centered above the corresponding tables. For figures containing multiple subfigures, subfigure labels such as "(a)", "(b)", and "(c)" must not be embedded within the images. Instead, these labels must be placed outside the images, centered immediately below their corresponding subfigures and above the overall figure caption. For example: "Figure 1. Structure of RBFNN." and "Table 1. Definition of terms."

Figures and tables should fit within a single column. Do not place borders around the outer edges of figures. If a table, including its title, can fit on a single page, it must be placed entirely on that page and must not be split across two pages.

10. Equations

Equations (referred to as Eq. (1), Eq. (2), etc.) should be indented 5 mm from the left margin. Leave one blank line above and below each equation to clearly separate it from the surrounding text. Equations must be numbered sequentially, with the equation numbers enclosed in parentheses and aligned with the right margin, as in (1), (2), and so on. Do not use images or figures in place of properly formatted equations.

11. Citations

When citing references in the text, use the corresponding reference numbers in square brackets, such as [1]. References must be cited in numerical order, starting with [1], followed by [2], [3], and so on, according to their first appearance in the main text. Do not cite a reference with a higher number before a reference with a lower number has been cited for the first time. When citing two or more references together, place the reference numbers within a single set of square brackets, for example, [2, 4–5]. The reference list must be numbered in the same order as the first citations in the main text.

Conflicts of Interest

A Conflict of Interest statement must be included in every manuscript. Authors must disclose any conflicts of interest or explicitly state, "The authors declare no conflict of interest." Any personal, financial, professional, or other interests that could reasonably be perceived as influencing the presentation or interpretation of the research findings must be clearly disclosed.

Author Contributions

An Author Contributions statement must be included in every manuscript with multiple authors. A brief paragraph specifying the individual contributions of each author should be provided. The following format may be used: "Conceptualization, XXX and YYY; methodology, XXX; software, XXX; validation, XXX, YYY, and ZZZ; formal analysis, XXX; investigation, XXX; resources, XXX; data curation, XXX; writing—original draft preparation, XXX; writing—review and editing, XXX; visualization, XXX; supervision, XXX; project administration, XXX; funding acquisition, YYY," as applicable.

Authorship should be limited to individuals who have made substantial contributions to the work presented in the manuscript.

Data Availability

Authors should provide a Data Availability Statement describing whether and how the data supporting the findings of the study can be accessed. If the data are publicly available, the name of the repository and the relevant URL or DOI should be provided. If the data cannot be shared due to privacy, confidentiality, or other restrictions, the reasons should be specified.

Acknowledgments

The Acknowledgments section should identify any organizations, institutions, or funding agencies that provided support for the work. For example: "This work was supported by the National Natural Science Foundation under Grant No. 405".

References

List and number all bibliographical references at the end of the paper using 11-point Times New Roman. References must be formatted according to the IJIES reference style, which differs from the IEEE reference style. Please follow the examples provided below carefully.

For each reference, list the authors using their initials followed by their family names (e.g., J. A. Smith). Separate two authors with "and"; for three or more authors, separate names with commas and place "and" before the final author. For references with seven or more authors, list the first six authors followed by italicized "et al." Do not abbreviate family names. Enclose journal and conference paper titles in curly double quotation marks (" "), followed by a comma outside the closing quotation mark. Italicize journal titles, conference titles, and book titles.

For journal articles, provide the journal title, Vol., No., page range (pp. xx-yy) or article number where applicable, and publication year, in that order. Capitalize "Vol." and "No." and omit the publication month. For conference papers, use "In: Proc. of" followed by the actual conference name, location when available, page range, and year. Include a verified DOI where one exists, in the form "doi: 10.xxxx/xxxxx", following the year; do not retain a duplicate DOI URL. For online-only sources without a DOI, give "[Online]. Available: URL" where appropriate.
